

Installation Guide

Logic Pro Controller Surface For Midi Fighter Twister

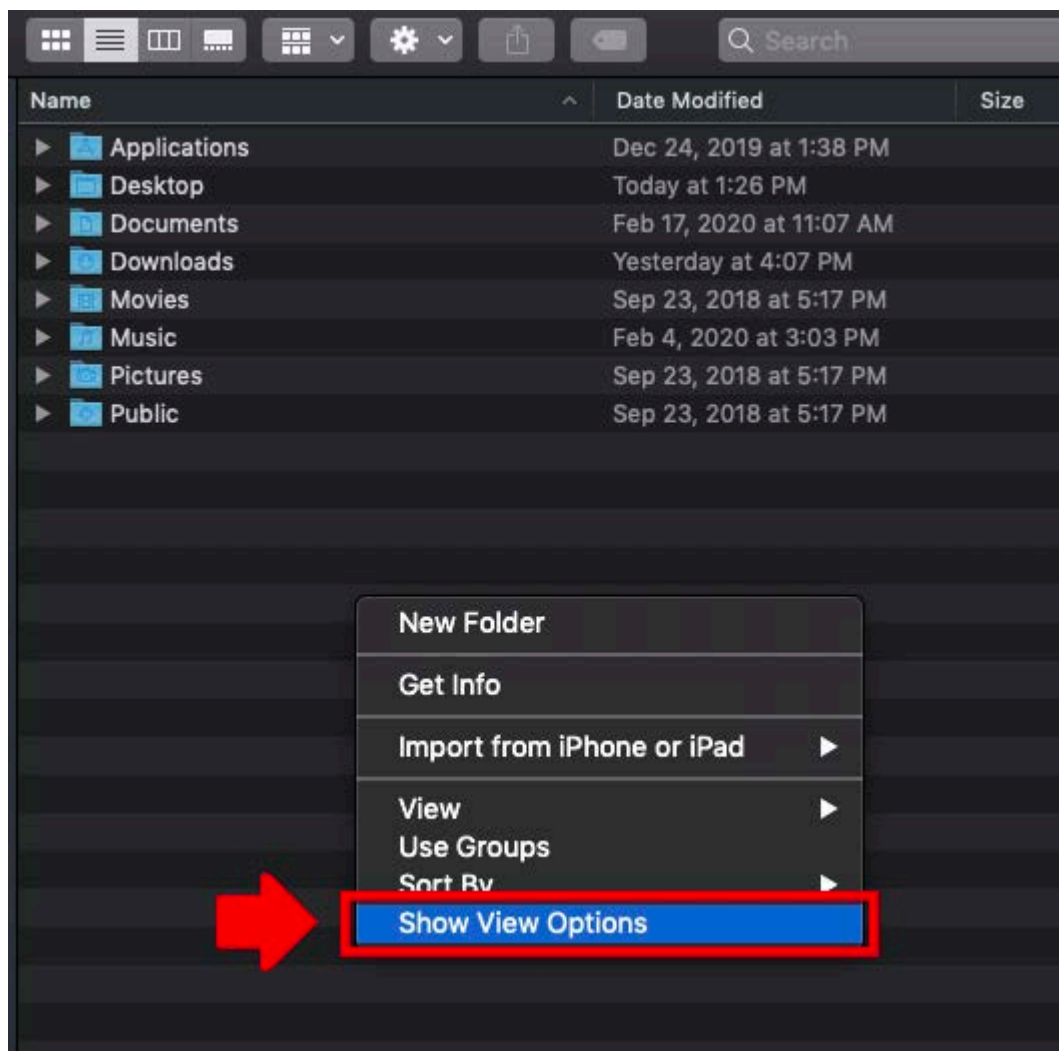

STEP 1:

Click on "Go" button in the menu bar and select "Home" in the drop-down menu menu. Or press "Shift + Command + H".

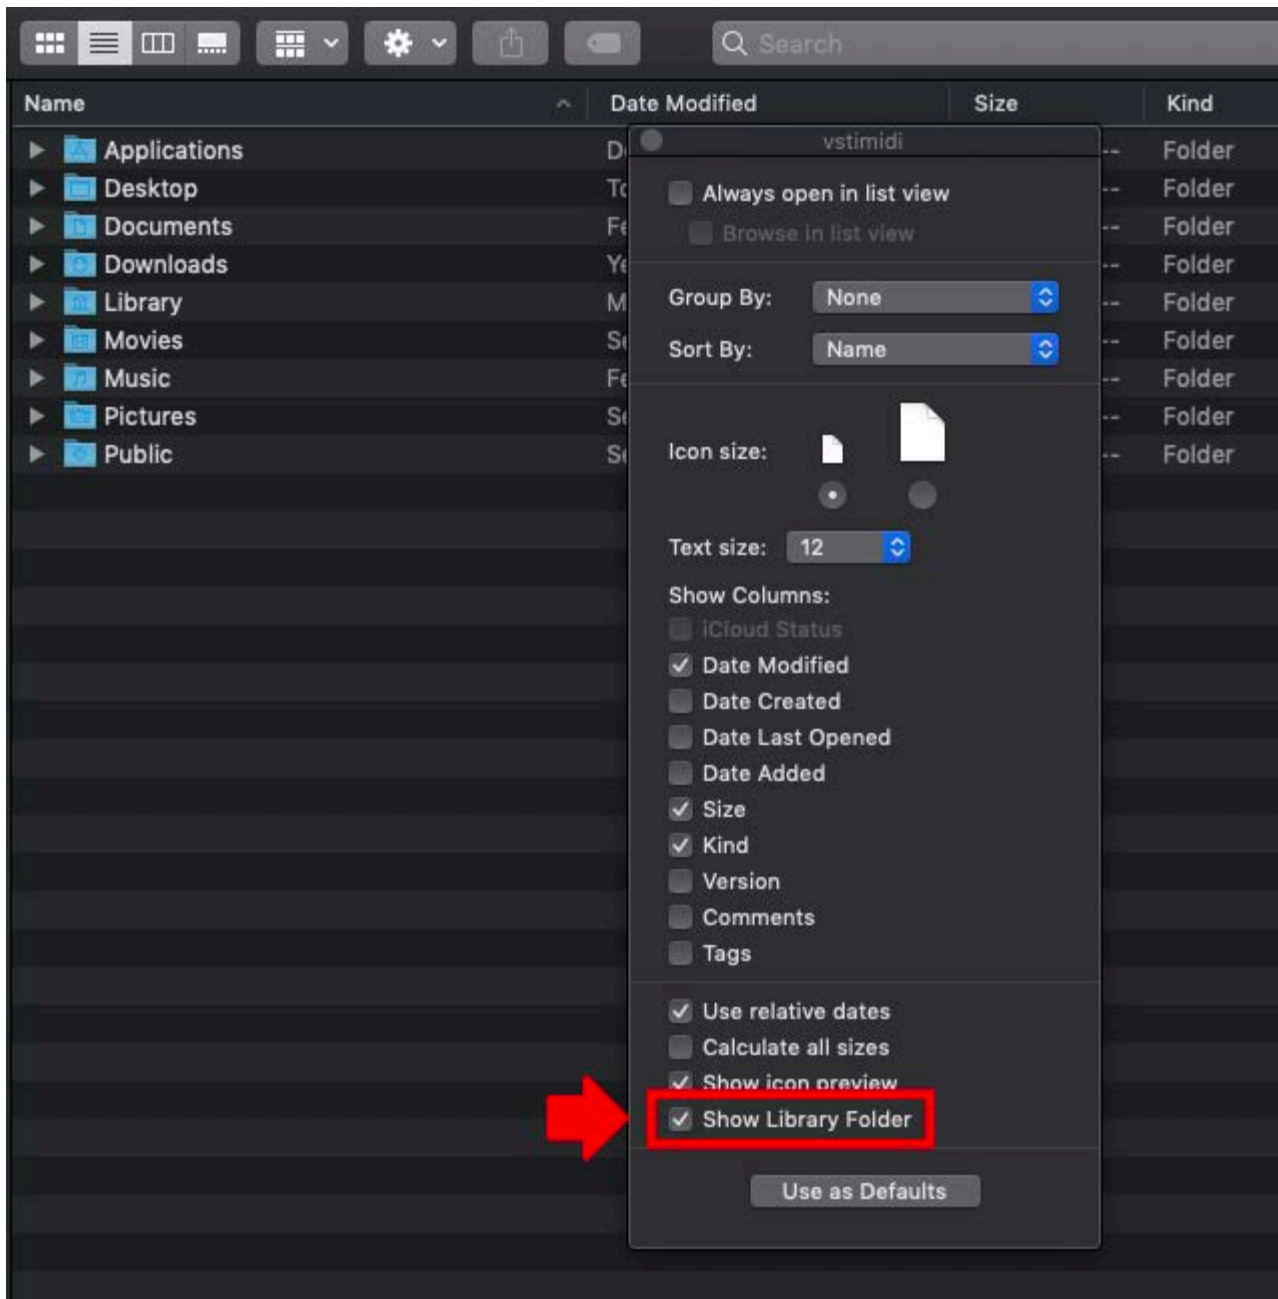

STEP 2:

Right-Click on the empty space in the window and select "Show View Options" as the following image illustrates. This applies only if Library folder isn't already visible in your System.

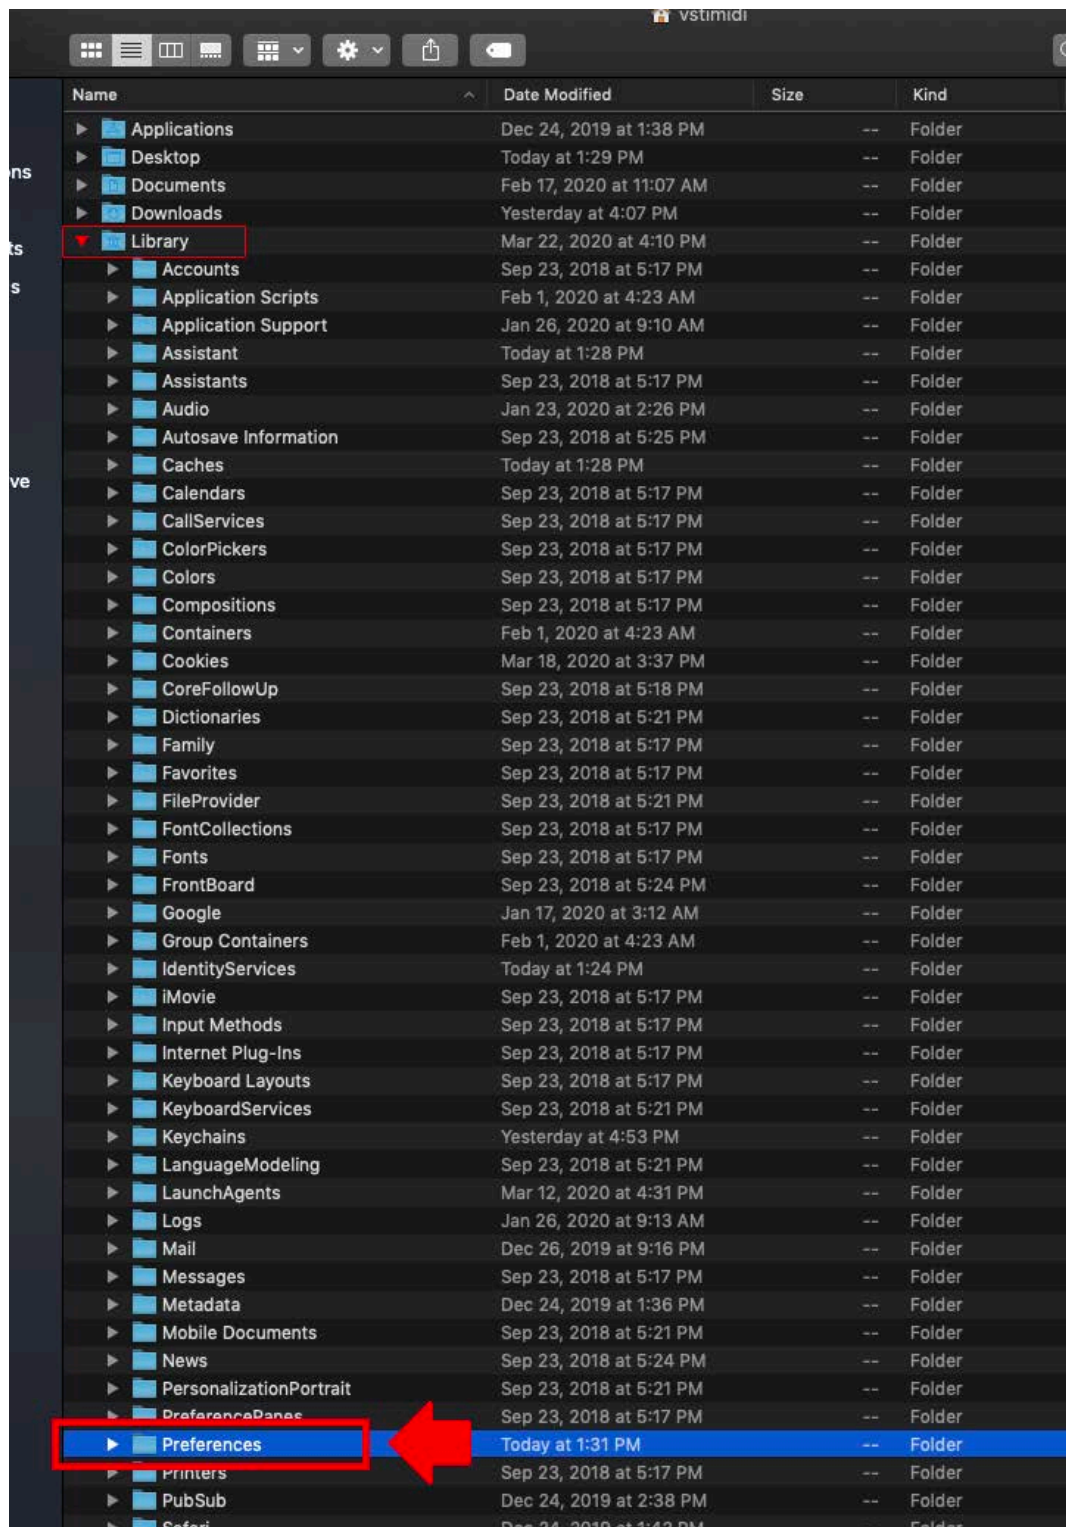

STEP 3:

The next window will appear. Be sure to tick the check-box next to "Show Library Folder" and close this window. This applies only if Library folder isn't already visible in your System.

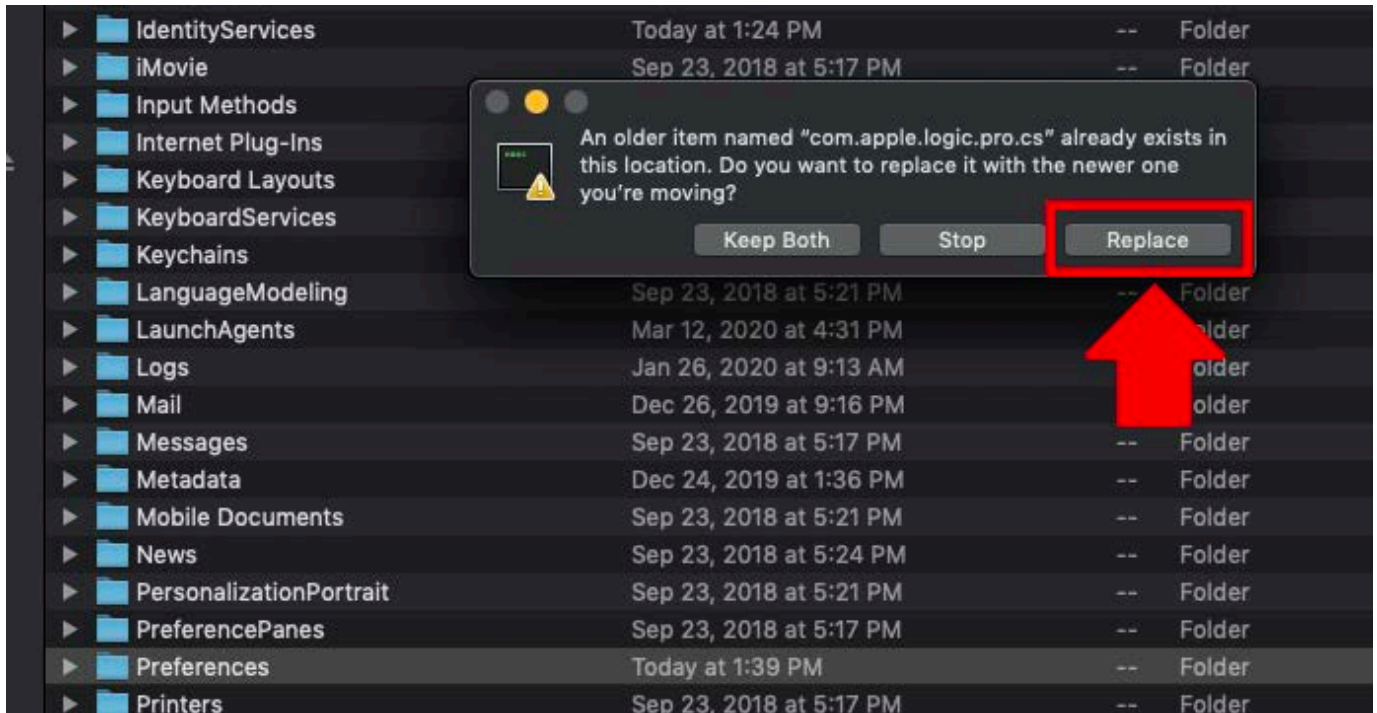

STEP 4:

Copy the provided "com.apple.logic.pro.cs" from the download and
Library --> Preferences.

STEP 5:

Click on "Replace" to replace the new mapping file with existing one.

STEP 6:

Open Midfighter Utility and import provided "Utility Settings - Logic Pro Twister" file by clicking on File --> Import Settings.
